Profile

Full Stack Web Developer with 3 years of experience building dynamic, responsive web applications. Skilled in both front-end and back-end technologies, delivering seamless and efficient digital solutions from concept to deployment. Strong collaborator with cross-functional teams, focused on writing clean, high-quality code and creating exceptional user experiences.

Work Experience

Full Stack Web Developer

HelloTree – Ghadir, Mount Lebanon | Jun 2023 – Sep 2024

- Led the development of a full-stack web application using Next.js (frontend) and Laravel (backend).
- Improved application performance by optimizing database queries and implementing caching, reducing load times by 20%.
- Built and integrated RESTful APIs, including connections to Instagram APIs for fetching posts and reels.
- Implemented user authentication (register, login, password reset, Google login via Socialite).
- Collaborated with designers and product managers to implement responsive designs.
- Mentored junior developers in full-stack development, increasing team efficiency and code quality.

Junior Web Developer

HelloTree – Ghadir, Mount Lebanon | Nov 2021 – Jun 2023

- Developed and maintained responsive portfolio websites and landing pages using HTML, CSS, and JavaScript.
- Collaborated on designing and implementing features for various small websites.
- Debugged and optimized website performance, reducing load time by 15%.

- Ensured cross-browser compatibility and version control using Git and GitHub.

Intern

HelloTree – Ghadir, Mount Lebanon | Jun 2019 – Aug 2019

- Assisted in building static web pages and creating responsive layouts with HTML and CSS.
- Gained experience in PHP and best coding practices through hands-on projects.

Projects

Revive Clinic

Technologies: Laravel, Tailwind CSS, HelloTree CMS, MySQL

- Developed a web application with Laravel for backend and Tailwind CSS for a responsive frontend.
- Built a custom CMS dashboard with HelloTree CMS for efficient content management.
- Designed and implemented database structure for dynamic content updates.

Code Hub Solutions

Technologies: Next.js, Tailwind CSS, Laravel, APIs, HelloTree CMS, MySQL

- Developed a web application with Next.js for server-side rendering and Laravel for backend.
- Created and integrated APIs for seamless communication between frontend and backend.
- Built a custom CMS dashboard and optimized the database for dynamic content and API handling.

Glutes with Tracy

Technologies: Laravel, Socialite (Google Login), Tailwind CSS, MySQL, HelloTree CMS

- Developed a full-stack Laravel website with user authentication (email, Google login) and a user management system for subscription requests.
- Managed database operations for user roles and subscription statuses.

Skills

- **Frontend:** HTML, CSS, SCSS, Bootstrap, Tailwind CSS, JavaScript, Next.js, jQuery, AJAX
- **Backend:** Laravel, PHP, MySQL, phpMyAdmin
- **Tools & Other Technologies:** GitHub, Slack, ClickUp

Education

Bachelor of Science (BS) in Computer Science

AUL (Arts, Sciences and Technology University) | Jan 2016 – Dec 2019
